Safety information

Shaver heads, foils and cutters

Read before use and keep these instructions.

Replacement shaving heads, foils, cutters and their holders.

> Do not use perforated, cracked or dented foils, broken cutters or loose heads. Do not press hard or use on injured skin. Stop for pulling, cuts, unusual heat or pain. Do not share skin-contact parts without appropriate hygiene.

Switch off the device, disconnect external power and prevent automatic or remote starting before replacement. Let moving parts stop. Isolate batteries or other energy sources as the device manufacturer directs; do not dismantle a built-in battery. Replace only user-serviceable parts. Internal electrical or structural repairs belong to a qualified service provider.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Remove hair gently; do not brush, pierce or rub a delicate foil unless the device manual permits that method. Rinse only washable assemblies; air-dry. Use oil or disinfectant only when compatible and recommended. A washable head does not make the whole shaver washable.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
