Safety information

Audio cables and detachable microphones

Read before use and keep these instructions.

Compatible audio signal cables, plug adapters and detachable headset microphones; not mains cables or chargers.

> Do not connect to mains power or an unspecified socket. Stop using damaged insulation, bent plugs, loose contacts or parts that become unusually hot. Keep cables away from children, moving machinery and necks; do not use them as straps.

Switch off the device, disconnect external power and prevent automatic or remote starting before replacement. Let moving parts stop. Isolate batteries or other energy sources as the device manufacturer directs; do not dismantle a built-in battery. Replace only user-serviceable parts. Internal electrical or structural repairs belong to a qualified service provider.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Disconnect by the plug, not the wire. Wipe dry, protect contacts from liquid and dirt, and store loosely coiled without sharp bends. Do not repair damaged insulation with a temporary tape wrap.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
