Installation and care

Mowers and robotic mowers

Read before use and keep these instructions.

Intended use

Blades, screws and external accessories listed for the stated mower. This guide does not authorise conversion to a different cutting system.

Use only the YIVO accessory specified for your device model, dimensions and mounting system. Keep the packaging or purchase record identifying the product and batch, if marked. These category instructions supplement the device manual; they do not confirm compatibility with every model. If instructions conflict or the part does not fit, stop and contact YIVO.

Before you start

Switch off the device, disconnect external power and prevent automatic or remote starting before replacement. Let moving parts stop. Isolate batteries or other energy sources as the device manufacturer directs; do not dismantle a built-in battery. Replace only user-serviceable parts. Internal electrical or structural repairs belong to a qualified service provider.

Installation

Isolate all energy and secure the machine as its manual directs. Wear protective gloves when handling stopped blades. Check the disc, threads and fasteners. Use the specified blade and screw type, arrangement and tightening torque from the device instructions. Replace the required complete set and fasteners. Check movement only as specified with power isolated; refit guards before testing.

> Cutting and ejection hazard: keep people and animals outside the machine's safety area. Gloves do not protect against moving blades. Never fit robot blades to a trimmer, bypass guards, straighten cracked or bent blades, or stop a disc by hand. Stop after impact or abnormal vibration.

Cleaning and storage

Mowers and robotic mowers

Inspect before operation and after hitting an obstacle. Replace damaged, loose or excessively worn parts. Clean only with energy isolated. Store and discard blades with cutting edges protected.

Start with a soft, dry, lint-free cloth. For a removable, non-porous surface compatible with water, use a cloth lightly dampened with clean water, then dry naturally. Keep liquid out of openings and electrical contacts. Do not soak leather, foam, glued layers or unmarked filters. Avoid solvents, abrasives, bleach, steam and direct heat unless expressly permitted for the accessory and surface.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
