Installation and care

Shaver heads, foils and cutters

Read before use and keep these instructions.

Intended use

Replacement shaving heads, foils, cutters and their holders.

Use only the YIVO accessory specified for your device model, dimensions and mounting system. Keep the packaging or purchase record identifying the product and batch, if marked. These category instructions supplement the device manual; they do not confirm compatibility with every model. If instructions conflict or the part does not fit, stop and contact YIVO.

Before you start

Switch off the device, disconnect external power and prevent automatic or remote starting before replacement. Let moving parts stop. Isolate batteries or other energy sources as the device manufacturer directs; do not dismantle a built-in battery. Replace only user-serviceable parts. Internal electrical or structural repairs belong to a qualified service provider.

Installation

Confirm the complete shaver model and head type. Disconnect charging. Release the old assembly as directed by the device manual; hold the housing, not the foil. Keep matched rotary cutters and guards together where applicable. Fit the replacement in the correct orientation and close every lock. Check seating before a brief test away from skin.

> Do not use perforated, cracked or dented foils, broken cutters or loose heads. Do not press hard or use on injured skin. Stop for pulling, cuts, unusual heat or pain. Do not share skin-contact parts without appropriate hygiene.

Cleaning and storage

Shaver heads, foils and cutters

Remove hair gently; do not brush, pierce or rub a delicate foil unless the device manual permits that method. Rinse only washable assemblies; air-dry. Use oil or disinfectant only when compatible and recommended. A washable head does not make the whole shaver washable.

Start with a soft, dry, lint-free cloth. For a removable, non-porous surface compatible with water, use a cloth lightly dampened with clean water, then dry naturally. Keep liquid out of openings and electrical contacts. Do not soak leather, foam, glued layers or unmarked filters. Avoid solvents, abrasives, bleach, steam and direct heat unless expressly permitted for the accessory and surface.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
