Installation and care

Hair clippers and trimmers

Read before use and keep these instructions.

Intended use

Cutting sets, guide combs, guards and external replacement accessories.

Use only the YIVO accessory specified for your device model, dimensions and mounting system. Keep the packaging or purchase record identifying the product and batch, if marked. These category instructions supplement the device manual; they do not confirm compatibility with every model. If instructions conflict or the part does not fit, stop and contact YIVO.

Before you start

Switch off the device, disconnect external power and prevent automatic or remote starting before replacement. Let moving parts stop. Isolate batteries or other energy sources as the device manufacturer directs; do not dismantle a built-in battery. Replace only user-serviceable parts. Internal electrical or structural repairs belong to a qualified service provider.

Installation

Confirm the model and mounting system, switch off and unplug. Remove the old part by its latch or specified screws. Fit the comb fully; set blade alignment and screw torque strictly to the device manual. Never adjust a moving blade. Check secure attachment and selected cutting length before a brief test away from skin.

> Broken comb teeth or a projecting moving blade can cut skin. Do not improvise zero-gap alignment or use a loose guard. Keep fingers away from cutters. Stop for snagging, excessive heat or damaged teeth.

Cleaning and storage

Hair clippers and trimmers

Remove hair with a suitable soft brush. Lubricate only specified points with compatible clipper oil if required; remove excess. Wash or disinfect only as permitted for the part. Let dry before use and protect cutters in storage.

Start with a soft, dry, lint-free cloth. For a removable, non-porous surface compatible with water, use a cloth lightly dampened with clean water, then dry naturally. Keep liquid out of openings and electrical contacts. Do not soak leather, foam, glued layers or unmarked filters. Avoid solvents, abrasives, bleach, steam and direct heat unless expressly permitted for the accessory and surface.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
