Installation and care

Audio cables and detachable microphones

Read before use and keep these instructions.

Intended use

Compatible audio signal cables, plug adapters and detachable headset microphones; not mains cables or chargers.

Use only the YIVO accessory specified for your device model, dimensions and mounting system. Keep the packaging or purchase record identifying the product and batch, if marked. These category instructions supplement the device manual; they do not confirm compatibility with every model. If instructions conflict or the part does not fit, stop and contact YIVO.

Before you start

Switch off the device, disconnect external power and prevent automatic or remote starting before replacement. Let moving parts stop. Isolate batteries or other energy sources as the device manufacturer directs; do not dismantle a built-in battery. Replace only user-serviceable parts. Internal electrical or structural repairs belong to a qualified service provider.

Installation

Check connector size, contact arrangement and any locking mechanism. Turn volume down and switch equipment off before connecting. Insert straight without force; operate locks as designed. Route the cable without tension or trapping. Test sound and microphone at low volume; a matching plug shape alone does not establish compatibility.

> Do not connect to mains power or an unspecified socket. Stop using damaged insulation, bent plugs, loose contacts or parts that become unusually hot. Keep cables away from children, moving machinery and necks; do not use them as straps.

Cleaning and storage

Audio cables and detachable microphones

Disconnect by the plug, not the wire. Wipe dry, protect contacts from liquid and dirt, and store loosely coiled without sharp bends. Do not repair damaged insulation with a temporary tape wrap.

Start with a soft, dry, lint-free cloth. For a removable, non-porous surface compatible with water, use a cloth lightly dampened with clean water, then dry naturally. Keep liquid out of openings and electrical contacts. Do not soak leather, foam, glued layers or unmarked filters. Avoid solvents, abrasives, bleach, steam and direct heat unless expressly permitted for the accessory and surface.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
