Installation and care

Watch straps, bracelets and adapters

Read before use and keep these instructions.

Intended use

Straps, bracelets, spring bars, adapters, buckles and strap keepers.

Use only the YIVO accessory specified for your device model, dimensions and mounting system. Keep the packaging or purchase record identifying the product and batch, if marked. These category instructions supplement the device manual; they do not confirm compatibility with every model. If instructions conflict or the part does not fit, stop and contact YIVO.

Before you start

Switch off the device, disconnect external power and prevent automatic or remote starting before replacement. Let moving parts stop. Isolate batteries or other energy sources as the device manufacturer directs; do not dismantle a built-in battery. Replace only user-serviceable parts. Internal electrical or structural repairs belong to a qualified service provider.

Installation

Check lug width and mounting type: quick-release spring bar, QuickFit-style clip, sliding adapter or screws. Release using the device's intended mechanism; never force an incompatible connector. Fit and lock both ends. Support the watch and gently pull to verify retention. Adjust comfortably and close the buckle; when removing, slide the strap out of keepers instead of pulling upwards.

> Loose fasteners may cause the watch to fall. Do not wear too tightly or continue through skin irritation. Do not assume all materials suit allergies, water or sport. Magnetic closures require the precautions in the safety section. Straps are not safety restraints.

Cleaning and storage

Watch straps, bracelets and adapters

Remove surface dirt, sweat and moisture regularly. Keep leather dry; use gentle dry cleaning for unknown finishes. Clean and dry both skin and strap. Check keepers, pins and clasps; have bracelet resizing or screw adjustment done with suitable tools.

Start with a soft, dry, lint-free cloth. For a removable, non-porous surface compatible with water, use a cloth lightly dampened with clean water, then dry naturally. Keep liquid out of openings and electrical contacts. Do not soak leather, foam, glued layers or unmarked filters. Avoid solvents, abrasives, bleach, steam and direct heat unless expressly permitted for the accessory and surface.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
