Installation and care

Cycle computer cases and accessories

Read before use and keep these instructions.

Intended use

Protective cases and covers for the indicated cycle computer, including compatible Garmin Edge models; not structural bicycle components.

Use only the YIVO accessory specified for your device model, dimensions and mounting system. Keep the packaging or purchase record identifying the product and batch, if marked. These category instructions supplement the device manual; they do not confirm compatibility with every model. If instructions conflict or the part does not fit, stop and contact YIVO.

Installation

Clean the computer and case, align openings and fit without force. Ensure the device's original handlebar mount locks fully and any specified tether remains usable. Check button operation and charging clearance. With the bicycle stationary, check that nothing obstructs steering, brakes or cables.

> The case is not a mounting bracket, crash protector or safety tether. Never operate or adjust the computer while riding when this distracts from traffic. Stop riding before correcting a loose attachment. Do not use damaged mounts or cases that interfere with locking.

Cleaning and storage

Cycle computer cases and accessories

Clear grit and moisture from beneath the case, dry naturally and check retention regularly. Follow the device manufacturer's limits for weather and cleaning; the accessory does not increase water resistance.

Start with a soft, dry, lint-free cloth. For a removable, non-porous surface compatible with water, use a cloth lightly dampened with clean water, then dry naturally. Keep liquid out of openings and electrical contacts. Do not soak leather, foam, glued layers or unmarked filters. Avoid solvents, abrasives, bleach, steam and direct heat unless expressly permitted for the accessory and surface.

Warnings

Keep loose small parts, magnets and packaging away from small children and animals. Do not put parts in the mouth. If a magnet or button battery may have been swallowed, seek urgent medical help. Follow implanted-device manufacturers' advice around magnetic accessories. These parts are not toys.

Stop using a loose, cracked, deformed or damaged part, or if abnormal heat, noise, vibration, leakage or skin irritation occurs. Secure the device against restarting. Report safety issues to kontakt@yivo.pl and claims to reklamacje@yivo.pl, identifying the product, device model and problem; photos and an order number help. Seek emergency help for immediate danger.

Store clean and dry, away from heat and sunlight. Sort packaging and worn parts under local collection rules; protect sharp edges. Parts containing electronics or batteries require the appropriate separate collection. These instructions do not restrict statutory rights against the seller. Any commercial guarantee is additional.
